

Rust

Types

[unsigned] integer / float [<bits>]	[u32] i32 f32
boolean	bool
value false	false
value not	None
value some	Some()
value true	true
string	String
array [of] size <n>	[TOKEN; 0..1000]
convert to floating point / integer	parse::<f64>().unwrap()
convert to string	to_string()

Looping and conditionals

for each	for TOKEN in TOKEN {}
for loop [of <a> [in <n>]]	for i in 0..1 {}
while loop	while TOKEN {}
infinite loop	loop {}
iffae	if {}
shells	else {}
ternary	if TOKEN == TOKEN { TOKEN } else { TOKEN }
switch	match
case of	=>
lodge and / not / or	&& / ! /
default	-

Macros

macro assertion	assert_eq!()
macro format string	format!()
macro panic	panic!()
macro vector	vec![]
print to console	println!()
bind [mute]	let [mut]
refer to [mute]	&[mut]
long comment	///
add comment	//
name space	::
of type	:

VSCODE

Moving around a file

[(go to | jump to)] line <n>
go back <n>
go forward [<n>]

Display

[toggle] full screen
toggle orientation
zoom in [<n>]
zoom out [<n>]
sidebar
explorer
source control
keyboard shortcuts

key mappings

settings
